Marketing Content Producer,, SEBIZ Infotech

CHANDIGARH, INDIA, JUN 2009-OCT 2010

SKILLS & EXPERTISE

With experience in designing for ERP systems, I keep empathy and well-researched data at the core to create user-friendly solutions, with meaning and relevance. Through surveys, user testing and lots of sketches, I design to solve pain-points of the clients, giving a user-friendly and memorable experience.

I work with web design (code and design), Figma, Adobe XD, Illustrator, and other design tools. Combining UX with data visualisations and UI, I continue to work to improve my abilities.
